A curious experiment was made recently in the basin of a fountain in the Palais Royal, Paris. A glass globe, containing a certain liquid, immediately spread over the surface of the water, and the highest class and character, are now triump taking fire spontaneously, continued to burn with intense flame for about a minute, and throwing out a dense smoke, the basin had the appearance of being all on fire. Three gentlemen, well known to science, in Paris, have invented this tion connected with that mysterious compound fluid, after long and patient study, with the design of making it available in the lar frame, or deficient in vital power, it is recompresent war in burning ships, and in pro- mended as the only means of communicating that tecting or attacking fortified places, where of all the natural appetites, as well as the higher there may be a ditch. In most parts of Europe the vintage of the present year is far below the average. In Italy the vine has utterly failed. In Portugal and Spain there will be a great deficiency, and the correspondent of the National Intelligencer writes that the total returns at Bordeaux show wines brought to that place.

Relief in Five Minutes. TYLER'S COMPOUND GUM ARABIC SYRUI
